

POSITION DESCRIPTION

JOB TITLE:	Production Manager (PM)
DEPARTMENT:	Production
REPORTING TO:	Director, Plant Operations

SUMMARY:

Our Production Manager provides leadership to the management and supervision of the manufacturing processes, to ensure scheduled production levels are met for each shift and high-level sanitation is complete to meet Food Safety and QA standards. The Production Manager will work with the Director, Plant Operations to research and implement processes that minimize costs and waste while maximizing the highest quality production outputs.

The Production Manager will ensure that manufacture of products is carried out in accordance with internal and external standards and in compliance with Good Manufacturing Practices, HACCP and SQF requirements along with Work Safe BC standards.

TEAM COMPOSITION:

Works very closely with Production Manager (AM). Senior Supervisor Cook Room, Production PM Supervisors, and Sanitation Supervisor report to the Production Manager (PM). Warehouse and Maintenance PM Team Members receive work duties from their respective supervisors and are accountable to the Production Manager. Able to work collaboratively with Production Manager (AM) and act on behalf of Director, Plant Operations in his absence.

DUTIES AND RESPONSIBILITIES:

- Lead a Plant Supervisory Team in order to meet the highest quality production outputs required by inventory par levels.
- Champion a safety-first work environment and ensure clearly defined Company policies and procedures are strictly followed.
- Able to assist with the planning, implement and monitoring of efficient short- and long-term production, packaging, warehousing and shipping processes for all the Company's product lines.
- Ensure the Sanitation Team performs duties in the plant to the highest standards to create a clean work environment that will pass Food Safety and QA testing. Sanitation team will also conduct regular cleaning services for the office space in the facility to ensure team member satisfaction.
- Ensure all food safety policies and procedures and the principles of HAACP and SQF are implemented in conjunction with QA and adhered to throughout the plant by all management and team members.
- Actively manage the global SQF annual audit process with QA.
- Manage the maintenance and servicing schedules of production lines to minimize down times and maximize the capabilities of all equipment and machinery.
- Proactively maintain a safe working environment focused on prevention and ensure compliance with the Worker's Compensation Act and Guidelines including regular safety committee meetings, inspections and hazard audits.
- Responsible for high-level security in the facility to ensure all visitors to production sign in and are escorted at all times during a facility tour. Ensures all Team Members possess and use individually assigned company issued security pass cards. Responsible for ensuring all entrances and exits to the facility, including loading bays are monitored and remain secure at all hours. Assists with investigations any violations or breeches in security for the facility.
- Work with the Director, Plant Operations to constantly seek new ways to improve production efficiency and cost effectiveness and spearhead lean manufacturing and continuous improvement processes, as driven by the CQI (Continuous Quality Improvement) program.
